1. The following is an examiner's statement of reasons for allowance: Upon reconsideration and in view of applicants' remarks, the Examiner agrees that the instant claims are not taught or suggested by the prior art.

Initially the examiner notes that applicants' remarks regarding a radical polymerization reaction do not carry patentable weight for all of the claims, such as claim 1, since the polymerization in step d) is not limited to radical polymerization. However the Examiner does agree that patentees fail to adequately teach the presence of a polymer derived ceramic precursor. That is, the ceramic that is prepared in claim 1 must 1) be prepared from a polymer (where the polymer precursor is PDC) and 2) must be non-oxidic. The polymer precursor in Wiesner et al. is oxidic. See the bottom of column 4, line 52 and on, which teaches various metal oxides used to form the inorganic polymer. This teaching also includes metals and column 5, lines 15 and on, indicates that the metal need not be a metal oxide. Such metal forming precursors, however, will not result in a polymer. There is nothing that suggest the selection of the particular PDC as required by these claims. As such claims 1 to 22 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Margaret G. Moore whose telephone number is 571-272-1090. The examiner can normally be reached on Monday to Wednesday and Friday, 10am to 4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on (571) 272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
